About Us

MDU Media Technologies works with owners and managers of multiple dwelling units (MDUs) to provide residents with the latest in home entertainment, data productivity, home security and environmental control.

MDU Media Technologies structured wiring products allow for:

- multimedia (cable/satelliteTV)
- home entertainment systems, including exceptional surround sound for an enhanced listening experience, DVD/video sharing and whole-unit stereo
- home security, including key card access, video enabled intercom (always know who's at your door)
- temperature control with easy-to-operate touch screens
- internet connectivity, computer networking and data sharing (one cable/DSL modem, printer router).

MDU Media Technologies offers these options for new construction as well as building renovation and upgrades. Offering pre-wired units enables MDU owners/operators/managers to attract a higher caliber of tenant *and* retain residents. MDU Media Technologies also offers MDU owners and managers an inexpensive wiring maintenance plan which will protect their wiring investment.

MDU Media Technologies' experience in the MDU market includes:

- Provided structured wiring for entertainment and data needs at Highlands at Plaza Square, new construction of a luxury 40-story, 417-unit building in New Brunswick, NJ for Roseland Properties
- Structured wiring for a 310-unit 30 building complex in Barnegat, NJ for Walters Homes
- Structured wiring for entertainment and data at Highlands at Glenpointe, new construction of a 158-unit building in Teaneck, NJ for Roseland Properties.

MDU Media Technologies is your "one stop shopping" structured wiring solution, providing sales, design, installation, maintenance and ongoing wiring system repair and service. We have exceptional technical knowledge, with 20 years in the low-voltage wiring industry, and we use state-of-the-art systems and technologies. Our focus is to provide excellent service and customer care.

Let us handle all of your structured wiring needs.
