▫ About Us

MDU Media Technologies Inc. was formed in January 2003 by President Jeff Nadeau, who was integral in Verizon Connected Solutions' development of structured wiring. In the late 1990s Verizon CSI offered structured wiring to single family homes, and in 1999 began a Multi Dwelling Unit (MDU) project with Roseland Properties and Infinisys Inc., where Jeff was project and product development manager. While continuing to grow the business and product offerings to meet the needs of the property owners, Jeff increased the customer base to builders like Walters Homes, Kushner Properties, Trammell Crow and others.

In 2002 Jeff used his extensive industry knowledge to form **MDU Media Technologies Inc.** to serve multi dwelling property owners, single-family home builders and commercial entities.

MDU Media Technologies Inc. offers installation, maintenance and they also work with design consultants such as Infinisys to provide commercial wiring and structured wiring to single-family homes.

Jeff Nadeau has been in the industry installing/managing low voltage installations since 1986. Starting with installations of C/KU band SMATV's, interactive TV, school system networking, whole home audio systems, sports bar designs and installations, Jeff provided low voltage wiring to properties from Massachusetts to Virginia, on over 3000 units. **MDU Media Technologies Inc.** is certified in Direct TV, BICSI, Gilbert, OnQ and others.
